Article 1 — Use of artificial intelligence

1.1 In the current phase S.T.A.R. sells nothing and offers no service on request: everything on this site is free, and the engineering assessment and the paid work this document describes are not offered. This document stays as written until a lawyer or Andrea reviews it.

Article 2 — Where AI is used

2.1 • During development, AI coding assistants help write code, draft tests and review text. Their output enters S.T.A.R. only after independent checks: tests, comparison with other libraries and mutation testing.

Article 3 — Where AI is not used

3.1 • The published results are computed by deterministic code; no number on this website is produced by a language model.
• This website has no chatbot and no automated system that talks to visitors or generates content for them.
• No decision about a person is taken by an automated system.

3.2 The engineering judgement in an assessment is the responsibility of a person, who signs the report.
