Version history of the legal documents

Every change to a legal document is recorded here with its date; earlier texts remain available on request.

DATE	DOCUMENT	VERSION	CHANGE
2026-10-15	all	1.0	First publication: notice, terms, privacy, cookies, evidence disclaimer, security, licences, trademarks, accessibility, infrastructure, AI use, space and export, contributions.
2026-10-15	privacy, licensing	1.1	Added the in-browser Python (Pyodide, self-hosted, runs locally) and the downloads; no new personal data.
2026-10-15	acceptable-use, minors, billing, consumers, third-party-requests, data-breach, processing-record, terms	1.2	Added acceptable use, minimum age, payments and invoicing, consumers and complaints, requests to third parties, personal data breaches and the record of processing; the terms now state the age rules and link the payment rules. Added the permission matrix, the forms and, per package, the compliance sheet, SBOM and citation files.
2026-10-16	notice, privacy, billing, forms, licensing guidance	1.3	After an independent review: the legal notice no longer cites d.lgs. 70/2003 art. 7 for less than it requires; the privacy notice names GitHub's role for its server logs and where its transfer safeguards are described; the forms cannot send what is typed even without JavaScript; the clause approval in the offer-acceptance form is for businesses only; licence guidance no longer mentions a NOTICE file that does not exist.

DATE	DOCUMENT	VERSION	CHANGE
2026-10-20	terms	1.4	The terms now describe the free Workspace tools: they run on your device, send nothing to the owner, and check form and arithmetic without replacing official services (Agenzia delle Entrate, VIES, banks) or legal and tax advice.
2026-10-20	privacy, cookies	1.5	The Workspace questionnaire can remember your answers on your device, only if you tick the box; the privacy and cookie notices now say so, with the name of the stored item and how to delete it.
2026-10-21	licensing, third-party-requests	1.6	Editorial only: the in-browser section of the package pages is now called “Run in your browser” (it was “Try it here”), and the two documents that name it say so. No change of substance.
2026-10-21	all	2.0	PDF edition: every document is now a formal multi-page PDF with a cover, a table of contents, articles and numbered clauses, page numbers and an integrity block with the SHA-256 of the published text. The words of the documents are unchanged.
2026-11-01	all except the contract templates (1.0)	2.1	Cookie notice: the museum and the profile are listed (2026-10-31), with the test value of the profile page. Privacy: the folder check of the Security Center, vulnerability reports and contracts. Record of processing: recipient and retention of security reports. Evidence disclaimer: maturity and status words aligned with the Status page.

DATE	DOCUMENT	VERSION	CHANGE
2026-11-02	all except the contract templates (1.0)	2.2	Cookie notice: the profile page no longer writes a test value when it opens; a single control removes all local data; stored items have no expiry date. Privacy and record of processing: the legal basis of correspondence is stated in full. Minimum age: the page no longer says that no personal data are processed, and the age of 14 for writing is a precaution, not a legal limit.
2026-11-14	all except the contract templates (1.0)	2.3	Typefaces (editorial): the site now uses IBM Plex Sans and IBM Plex Mono (SIL Open Font License), named in the licensing and third-party requests documents; Space Grotesk and JetBrains Mono remain only in the social preview image. Notice: eleven documents (legal notice, terms, evidence disclaimer, acceptable use, minors, billing, consumers, AI use, privacy, record of processing, data breach) carry a notice above their unchanged text: in the current phase S.T.A.R. sells nothing and offers no service on request; the texts stay as written until a lawyer or Andrea reviews them. Forms: billing details, acceptance of an offer, assessment request, non-disclosure agreement and end-use statement are marked not in use.
